IPEX 2010 New Fastbind finishing supplies

ESPOO, FINLAND

Mapping announces the introduction of a new range of supplies to meet the needs of high quality photo album applications.

Fastbind Lay-Flat paper

This is a new, innovative laser printing paper for high quality lay-flat book applications. With patents and design patents pending, this new paper promises to bring customers excellent finishing results at a very competitive price. In addition to excellent lay-flat properties, the new paper runs smoothly through digital printers and reduces stress on book bindings, generating an overall stronger bind. This high quality paper is suitable for Fastbind perfect binding and precision side-staple binding machines, as well as third party binding solutions.

- Matt-coated 170g/m²
- Sheet size SRA3 (320x450 mm)
- For laser printing only

Fastbind Lamifree™

Fastbind LamiFree™ is a completely new self-adhesive material for printed hard cover production. These tacking sheets bring a significant improvement to hard cover book finishing: no lamination is needed. Using these tacking sheets means no more annoying problems with air bubbles, no expensive lamination equipment, and no more lamination supplies.

Fastbind LamiFree™ tacking sheets are intended for laser printing only.

Fastbind SnapCover™

Fastbind SnapCover™ is a new, innovative solution for printed hard cover making. One SnapCover™ set includes two cover boards and a spine stick. These three are bound into a single unit for easy placement on the printed cover tacking sheet. Once positioned, temporary spacers between the cover boards and spine stick are removed, and your printed hard cover is ready for corner cutting and folding.

Fastbind plastic mounting and end sheets

New Fastbind plastic mounting and end sheets bring improved quality to photo albums with the Fastbind FotoMount™ equipment. The plastic mounting and end sheets reduces the impact of humidity on your photo albums.

COMPANY OVERVIEW

About Maping

Maping Co, established in 1978, develops and manufactures Fastbind finishing solutions. Fastbind products, available through dealers in over 90 countries, are designed to meet the demands of digital printing.

Our offering includes pioneering binding machines, cover makers, creasers and other equipment, as well as design software, lay-flat paper, and a range of supplies. Fastbind products are enjoyed by many types of users, and Maping Co is a selected partner of several major digital printer manufacturers.

Digital printing offers you the luxury of flexibility and versatility. Changing formats is a breeze. But you don't have the luxury of test runs. On-demand publishing is often a single run affair. You have to be sure that the quality is perfect the first time. There is no second chance.

This is why Fastbind solutions put a great deal of emphasis of the quality of the binding results. Our solutions are flexible while at the same time producing the highest quality results on the market, the first time every time.

Unique and complete finishing solutions:

- Support printed hard and soft cover books
- Create various formats without adjustments
- Deliver highest finishing quality

Fastbind at IPEX 2010

Fastbind finishing solutions are presented at the following stands:

- Maping main stand:
Hall 20, Stand D642
- Xerox stand:
Hall 07, Stand CD450
- Canon stand:
Hall 10, Stand CDEF270
- Konica-Minolta stand:
Hall 09, Stand DE340
