**CASEMATIC H32™**  
**Case Maker**

Professional tailor-made hard covers and cases  
Versatile applications  
For covers up to 330 x 330 mm / 13" x 13"

### Professional on-demand hard covers and cases

The Casematic H32™ is a new Fastbind advance for on-demand case making. In minutes, you produce professional tailor-made cases in the format of your choice, up to 13" x 13". You print your design on your digital printer to create your customized cover.

The Casematic H32™ produces cases for many types of applications: books and photobooks covers, CD, DVD and Blue-ray cases, ring binders and many more. It's the ideal solution for photographic studios, photo labs and professional photographers as well as digital printers, copy shops and on-demand publishers. Fully featured and compact, this tabletop unit fits naturally in any environment.

### Featured for the best result quality

Fastbind Casematic H32™ is very easy to use. You position your printed cover on the unique positioning table. The suction assistance and centre line ensure an accurate placement. The illuminated area includes registration marks for thicker and thinner coverboards. You quickly change the spacers for spine guides to adjust the gap between the cover boards and spine stick.

### Optional accessories

To fulfill your needs, you can equip your Fastbind Casematic H32 with extra tools. Fastbind Corner Cutter Ha10™ cuts the four corners of your cover in an even and accurate way. You can adjust it to the thickness of the boards. The Side/Back Guide makes the registration of opaque cover materials easier and the production of small or medium series faster. Fastbind also provides all the necessary supplies for your cover production, including printable tacking sheets, grey boards and end-papers..
