Create professional hard covers and cases

Casematic XT represents a new step forward in Fastbind range for on-demand hard cover making. In a short time, you can be producing high-quality books in a wide variety of formats, from A5 to A3+. Once the cover is built, you can use a Fastbind binder to bind the content with either perfect binding or free-floating spine (lay-flat).

Fully featured and compact, this table top unit can fit naturally in any environment and cover all short runs and on-demand needs.

Built-in light table

The unique card board positioning method makes it quicker than ever to register your board on the printed tacking cover: the light table includes a centre line, scaled and top line for the most accurate settings. A suction assistance for placing the tacking paper is controlled by a foot pedal. Fastbind Casematic XT also integrates a user-friendly edge-folding unit, with an adjustable roller gap for an easier operation. Anyone can create professional quality customized luxury book in minutes!

Other applications

The original design of the Fastbind Casematic XT allow not only to create book covers, but any other fully decorated hard cases: CD and DVD boxes, restaurant menus... You just need to change the two spine guides from a 8mm-groove to a 3mm one.

Fastbind supply program

Fastbind can supply all the necessary materials to produce hard covers in a print-on-demand environment. The product family consists of printable tacking sheets (for laser or inkjet), adhesive endpapers, grey boards and laminating materials.

Scaled light table, positioning line, suction assistance and interchangeable spine guides

Built-in edge folding unit.
